Projects

Leaflink | A sustainability app integrating Gemini AI

A Gemini AI and Flutter based application that provides sustainable reduce, reuse and recycle solutions for day-to-day waste using image identification and prompt-based generation. As well as tracks user contributions.

Technology used - Firebase, Flutter, Gemini AI vision pro model, Google AI studio, Android Studio

NoteIt | An innovative note-taking app

A Flutter-based application with a pleasing UI that allows users to take notes and add media like images for reference, change themes as pleased and download the notes to save on their device.

Technology used - Flutter

Roles & Activities

GDSC ABESEC | Visual Aids Coordinator

2024-present

- Experienced in developing engaging visual content such as infographics, presentations, posters, and videos to effectively convey complex information and concepts.
- Skilled in Canva to create visually appealing and effective visual aids.

Project Leaflink | Team Lead

2024

- Led a multidisciplinary team in the development and execution of Project Leaflink, a GDSC solution challenge project for 2024, overseeing tasks, timelines, and deliverables to ensure successful project completion.
- Spearheaded the ideation, design, and implementation phases of Project Leaflink, leveraging creative problem-solving skills to address real-world challenges and deliver impactful solutions.
